

DynaPath 

# A-SERIES BED MILLS

3-Axis CNC for Job Shops, Tool Rooms, and General Production

Featuring Semi-Automatic + Conversational DXF + G-Code Programming

DynaPath 

# A-Series Bed Mills are offered in two styles:

## ATC HEAD

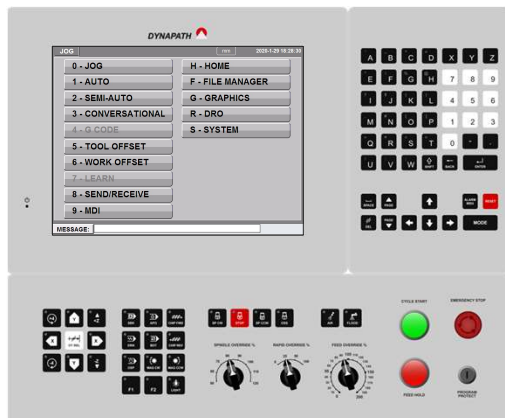

*The standard milling center for production*

- 10 HP Spindle up to 8000 RPM
- Automatic Tool Changer, up to 16 tools
- Spindle Orientation and Rigid Tapping

## D5 CONSOLE

12.1" Industrial touchscreen LCD Operating console with alphanumeric input panel and ATC + CNC operation.

## QUILL HEAD

*For manual work, tool rooms, and small lot jobs*

- 5 HP Spindle up to 5000 RPM with High/Low Gear
- Manual Quill with linear encoder, up to 127mm (5") of travel, in addition to CNC Z-axis

## D1 CONSOLE

12.1" Industrial touchscreen LCD Operating console for basic CNC operation.

# Advanced Path Planning with Look Ahead and Feed Forward

**Path Smoothing** algorithms provide precision control and curvature control. The result is the optimal tool path for speed and precision.

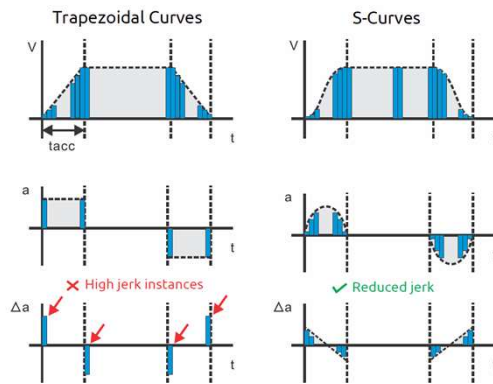

**Look Ahead** anticipates upcoming programmed motion, and plans the optimal trajectory in real time up to 1000 blocks.

**Smart Interpolation** ensures machining accuracy by performing acceleration and deceleration before path interpolation.

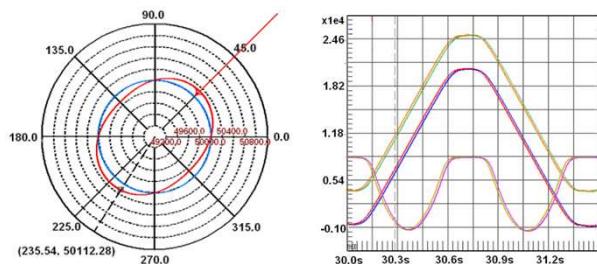

**Jerk Reduction** is performed by using trapezoidal or S-curve acceleration and deceleration, allowing smoother motion, higher machining speeds, and helps protect against machine wear.

## Without Feed Forward and Friction Compensation

XY and Z axes motion accuracy is prone to in correctable position errors, as demonstrated in the following plots on a circular tool path of 28.3mm diameter, at 8 m/min feed rate. In this case the final trajectory has a maximum position error exceeding 20  $\mu\text{m}$  and more than 6  $\mu\text{m}$  reversal spikes are presented.

## With Feed Forward and Friction Compensation

XY and Z axes motion accuracy is greatly increased, as demonstrated in the following plots on a circular tool path of 28.3 mm diameter, at 8 m/min feed rate. The final trajectory has a maximum position error within 5  $\mu\text{m}$  and the reversal spikes are less than 2  $\mu\text{m}$ .

WinDelta® CNC is the most versatile control for all your many operations:

## Semi-Automatic + Conversational Programming + G-Code

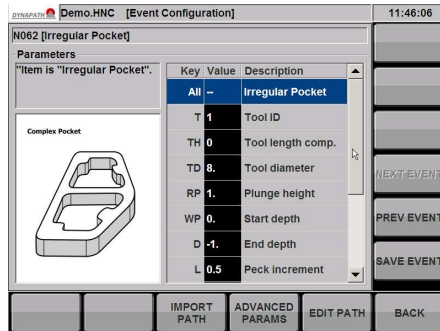

### SEMI-AUTOMATIC OPERATION

For quick and simple jobs, or work requiring the skilled hands of an experienced machinist, **Semi-Automatic Operation** functionality offers operators the most **friendly and familiar** way to do the job.

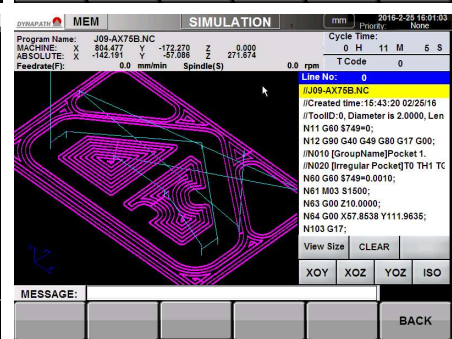

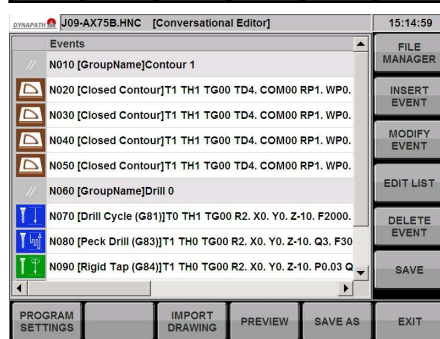

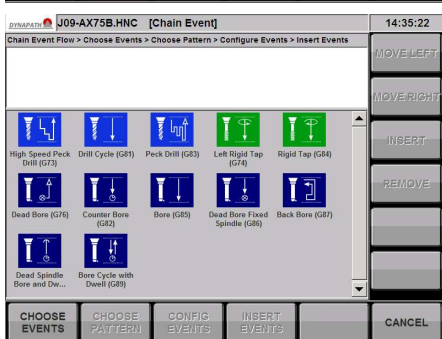

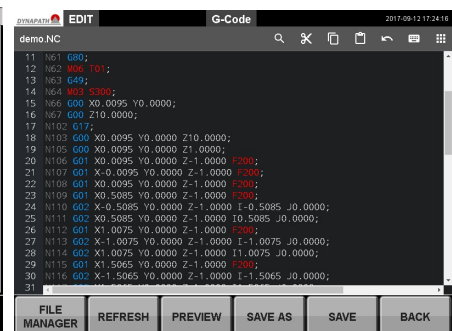

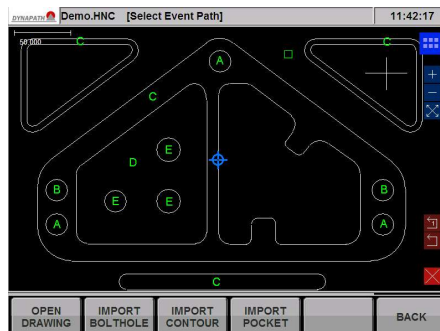

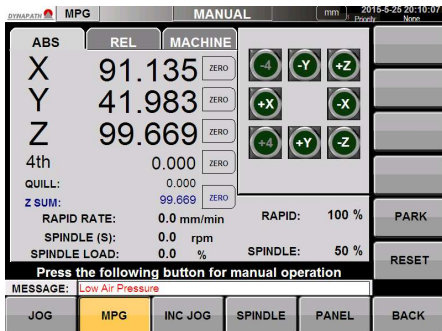

### CONVERSATIONAL PROGRAMMING

For general parts and jobs, the **Conversational Editor with DXF Import** enables any operator to generate part programs without writing G-Code, oftentimes faster than it takes to set up for the part.

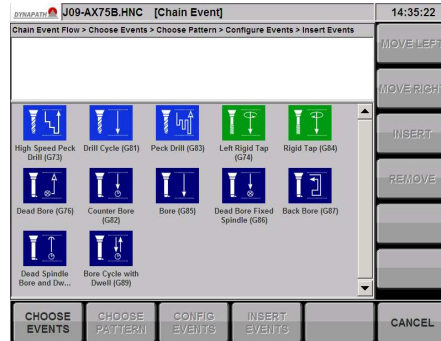

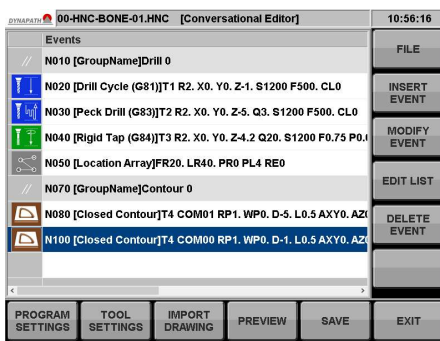

### CAD/CAM G-CODE

For CAD/CAM users, simply post-process to standard **ISO/EIA G-Code**, then send the program via **USB or networked file transfer** to the control, and fully leverage the power of CNC production.

# DynaPath WinDelta® Programming

## Conversational Programming + DXF Import + G-Code Editing

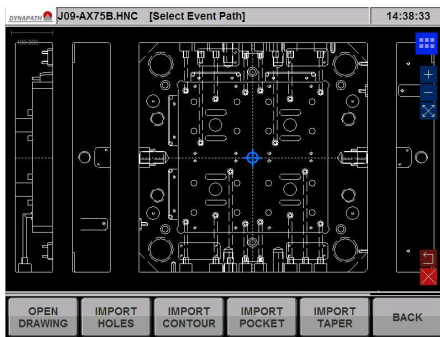

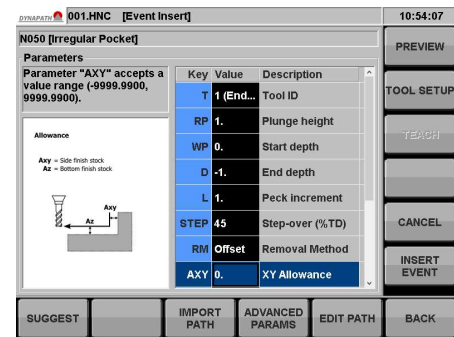

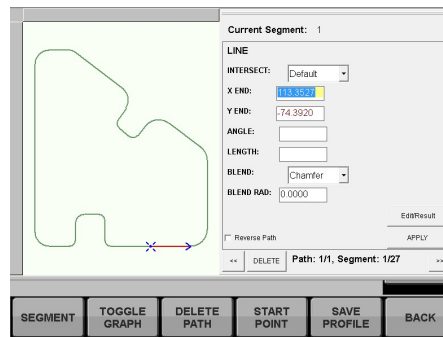

**Conversational Event Based Programming** allows making part programs by simply choosing machining events and configuring its parameters, without having to write G-Code.

**Built-in Events** include standard drill, bore, tap, contour, pocket, helix, pattern, setup, and auxiliary events.

**Smart Profile Editor** allows quick and easy path creation and assists with geometric calculations.

**Conversational Graphics** convey detailed information about event parameters using graphical illustrations to assist with data entry.

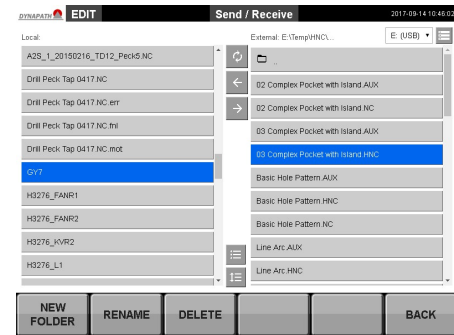

**DXF Drawing Import** allows direct geometry import from CAD drawings via an intuitive, touchscreen interface, saving programming time and reducing errors.

**Preview Simulation** allows visual inspection of generated tool paths and final dimensions.

**G-Code Editor** enables ISO/EIA G-Code editing for writing standard G-Code part programs or to fine tune CAD/CAM posts.

**File Manager and Server** allows USB file transfer and Networked FTP file management of all part programs and drawings on the control.

**A-SERIES BED MILLS - SIZE AND SPECIFICATIONS**
